Some Help With

How do I generate the AnyDesk installers for Mac?

TABLE OF CONTENT

To generate installers for Mac:

1. Go to https://my.anydesk.com in the Files section.
   ==========
2. Create New ==========
3. Expand the list and choose the type of package you want to create.
   ==========
4. Define the options: ==========
   1. Package or executable name
   2. If you want to restrict incoming sessions, outgoing sessions, or both
   3. Define general configuration options
   4. Define a logo (optional)
   5. Set proxy and advanced options (optional)
   6. Define an internal name for easy reference
   7. Decide whether to create a public link for the package.
   8. Save
