AnyDesk 9.8.1 Update: Key Bug Fixes and UI Improvements for macOS Users

In the October 8, 2026 update for AnyDesk, version 9.8.1 on macOS, several important bug fixes have been implemented. Notably, the size of the toolbar icons has been adjusted for better visibility and functionality. Additionally, issues related to the Permission Assistant buttons on macOS 27 Golden Gate have been resolved, enhancing usability significantly. Moreover, minor improvements to the user interface have been made to optimize the overall user experience. Stay updated with these enhancements to ensure your remote desktop operations run smoothly and efficiently!
