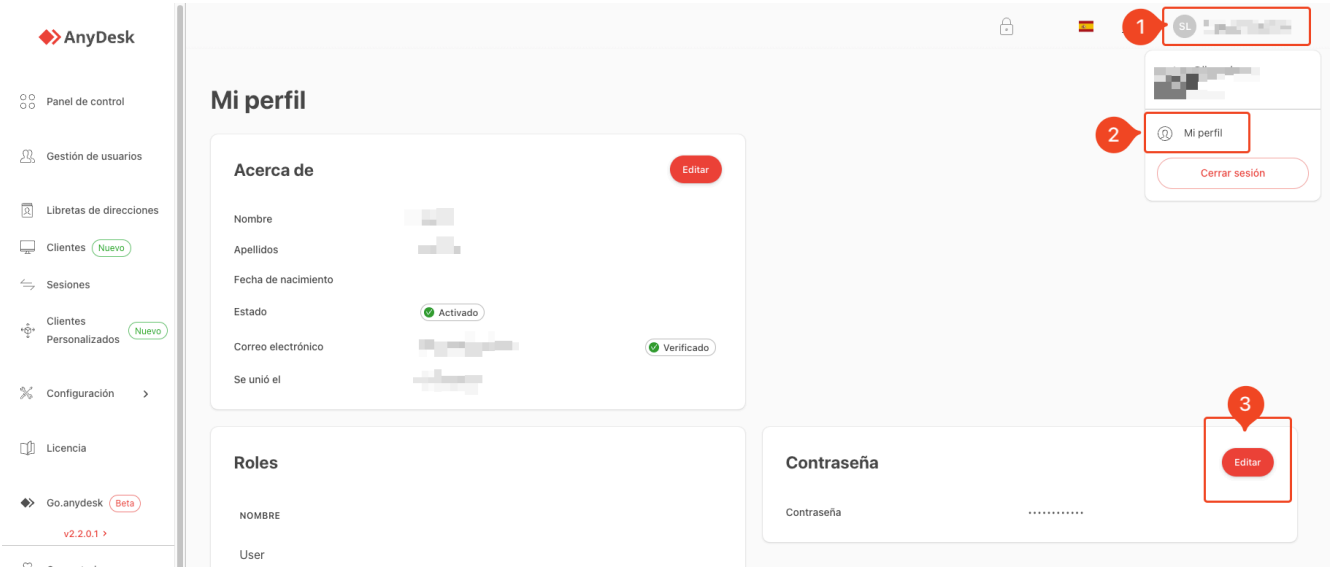
Some Help With

How to Change Your AnyDesk Client Portal Password: Step-by-Step Guide

To change the password used in the AnyDesk client portal, follow these steps:

1. Go to the portal my.anydesk.com.
2. At the top right, click on your `username`.
3. In the dropdown menu, click on `My Profile`.
4. In the password section, click on `Edit`.
5. Enter the new password you want to set. Make sure to consider the password security policies provided. Ensure it's a unique password and store it in your preferred password manager to avoid forgetting it.
6. Save the changes made.



Once the changes are saved, you will need to use the new password for your next access to the portal.
