AnyDesk 7.1.0 Update: Key Features and Bug Fixes for Linux Users - September 2025

TABLE OF CONTENT

AnyDesk Update Summary - September 16, 2025

AnyDesk Update Summary - September 16, 2025

Version: 7.1.0 (Linux)

New Features:

- A new network information popup has been introduced, enhancing visibility into the connection status.

Bug Fixes:

- Fixed a deadlock issue that occurred when starting the service.
- Resolved a deadlock that happened when maximizing the application window during the initiation of an outgoing session.
- Addressed a crash error that caused the program to unexpectedly close when starting or logging out of the AnyDesk account after an incoming or outgoing session.
- Fixed a reconnection problem to a remote device that failed after using privacy mode in the previous session.
- Corrected the transmission of back/forward mouse button events to the remote side.
- Added a missing retry button in some error dialog boxes.
- Fixed the deactivation of file clipboard synchronization in the session toolbar.
- Resolved a failure in the follow focus function of the remote window.
- Corrected the automatic display of the remote cursor.
- Fixed an issue where the automatic VPN checkbox did not enable during a session.
- Addressed inaccuracy in the search function of the session player.
- Fixed a bug that closed an active outgoing session when enabling AnyDesk One.

- Defined that registering an alias should not be possible with a free license.
- Corrected the incorrect behavior when moving an item in the address book, which acted like a copy.
- Resolved an issue where the image did not appear in outgoing sessions when reconnecting using the retry button.
- Fixed permission issues in the session information popup.
- Corrected the functionality of the Input Method Editor that was not working properly during an outgoing session.
- Made several minor UI/UX improvements.

This update brings significant enhancements to the stability and usability of the software, addressing numerous bugs that affected daily operations.
