Some Help With

AnyDesk: Account Creation Optional but Advantageous for Extended Remote Access and Management

“Do I need to create an account to use AnyDesk?

Creating an account is not mandatory to use AnyDesk. However, having an account provides the advantage of staying connected to a remote device for longer periods, managing up to 3 devices, and creating your own Address Book. Additionally, with an account, you gain access to my.AnyDesk.com where you can find detailed information on all your connections, roles, permission sets, and configure Two-Factor Authentication, among other features.

Creating an account with AnyDesk is free of charge. Learn how to do so here.“
