AnyDesk for macOS Update 9.7.2: Enhancements and Bug Fixes for Improved User Experience

On July 2, 2026, AnyDesk for macOS was updated to version 9.7.2, introducing a range of bug fixes and enhancements designed to improve user experience. The update brought a refreshed appearance to icons in the toolbar, addressed an issue that could potentially cause the application to crash, and included various small improvements aimed at refining overall usability. These enhancements are part of AnyDesk's ongoing commitment to optimize performance and provide a seamless user experience.
