AnyDesk Update 8.0.3: Essential Bug Fixes for Raspberry Pi and Linux Platforms

The AnyDesk update released on June 23, 2026, version 8.0.3, brings essential bug fixes for Raspberry Pi and Linux platforms. This update addresses an issue that could lead to application crashes on both versions. While no new features are introduced in this release, the primary focus is on enhancing the overall stability of the software, ensuring a smoother and more reliable user experience.
