AnyDesk Update 9.6.5 for macOS: Key Bug Fix and End of Support for Older Versions

The AnyDesk update on March 24, 2026, version 9.6.5 for macOS, introduces a significant bug fix addressing the issue with the automatic update checker. Notably, this will be the last version to support macOS versions 10.13 to 10.15. To continue receiving future updates, users are encouraged to upgrade their operating system to a more recent version.
