Some Help With

AnyDesk Update 9.7.7: Key Fixes, Meeting Creation Without License, and Improved Japanese Translations

In the AnyDesk update released on June 22, 2026, several fixes and enhancements were introduced. One of the key corrections addressed an issue that previously prevented users from creating meetings without an active license. Additionally, updates were made to Japanese translations to enhance the experience for users who speak that language. The version associated with this update is 9.7.7 for Windows.
