AnyDesk Update: Improved Chat Compatibility and Bug Fixes for Multiple Platforms

In the AnyDesk update released on February 13, 2026, several bug fixes were introduced to enhance chat compatibility within AnyDesk One. This improvement spans multiple platforms, including Raspberry Pi, Linux, macOS, and Windows, featuring version 7.1.4 for Raspberry Pi and Linux, along with versions 9.6.3 and 9.6.11 for macOS and Windows, respectively. These updates ensure a more seamless functionality and user experience when communicating through the chat feature of AnyDesk One.
