AnyDesk Update July 2026: New Features, Bug Fixes, and Enhancements for Windows and Android

TABLE OF CONTENT

- Version 9.7.9 for Windows
- Version 8.4.0 for Android

Summary of New Features and Fixes in AnyDesk - Update as of July 6, 2026

Version 9.7.9 for Windows

New Features:

- The file manager now supports drag-and-drop functionality, making it easier and more intuitive to manage files.
- An up arrow shortcut has been added for quick editing of the last message, enhancing communication efficiency.

Bug Fixes:

- Resolved an issue related to session request handling that affected user connectivity.
- Fixed a crash that occurred when starting a session while the service was disconnected, improving overall reliability.
- Addressed clipboard issues during side-switching sessions, ensuring seamless content sharing.
- Enhanced chat stability by fixing multiple crashes, allowing for a smoother user experience.
- Improved message feed behavior along with better keyboard navigation, facilitating effective use during sessions.

- Corrected issues with typing indicators, group chats, message previews, reactions, and draft editing.

Other Changes:

- User interface improvements for a more appealing and user-friendly experience.
- Enhanced Norwegian language translation for better accessibility.

Version 8.4.0 for Android

New Features:

- Added support for Android 17, ensuring compatibility with the latest mobile technologies.
- Expanded the service API for profile management, offering more capabilities for users.
- Improved user experience for permission requests, making the process clearer and more streamlined.
- Enhanced handling of privacy policies to better inform users and protect their data.

Bug Fixes:

- Fixed an issue where the tutorial did not display complete text, ensuring users receive all necessary information.
- Resolved a crash that happened when custom tabs were unavailable, promoting stability and functionality.
- Corrected a bug that could lead to the deletion of the wrong item from quick bookmarks, enhancing user control.
- Overall stability improvements ensure a more reliable application experience.

This update features multiple enhancements that optimize functionality and performance in AnyDesk across both platforms, providing users with better tools and a smoother experience.
