Overview of New Features and Bug Fixes in AnyDesk Update - May 7, 2026

Discover the latest enhancements and fixes in the latest AnyDesk update, set to elevate your remote collaboration experience to new heights!

New Features:

- **Improvements in AnyDesk One Meeting**: Users can now switch between different audio and video devices, with changes taking effect immediately—no need to disable and re-enable.
- **Persistent Configuration**: Selected audio and video devices are automatically recognized for future connections, ensuring a seamless experience.
- **Streamlined Access**: Audio and video settings have been relocated from Preferences to device settings during meetings, making them easier to access.
- **Microphone Control**: A new slider for microphone gain has been introduced, allowing for more precise volume adjustments.

- **Chat Panel**: It is now possible to display a chat panel during meetings initiated through AnyDesk One Chat, enhancing communication.
- **Webcam Support**: Enhanced compatibility for a wider range of webcams, with automatic resolution and frame rate selection tailored for optimal performance at 720p 30 FPS.

Bug Fixes:

- Resolved an installation crash that occurred when a printer driver was present.
- Corrected a typographical error in a permission name used in command line options.
- Fixed a user interface issue within the AnyDesk One settings.
- Addressed a problem in meetings where disconnecting audio or video devices rendered them unusable.
- Rectified a bug that disabled an active webcam when connecting a second one.
- Fixed inconsistency in the meeting sidebar theme when dark mode was enabled.

Additional Changes:

- Full screen mode is now enabled by default, providing users with an immersive meeting experience right from the start.

This update significantly enhances the user experience in meetings, providing more effective control over audio and video devices while addressing several existing bugs. Get ready to enjoy a smoother, more productive collaboration environment with AnyDesk!
