AnyDesk Version 9.0.11 Update: Key Bug Fixes and Performance Improvements Released February 2026

AnyDesk Update Summary - February 9, 2026

On February 9, 2026, AnyDesk released version 9.0.11 for Windows, bringing a host of important bug fixes. This update specifically targets performance issues and user interface glitches that have been impacting users with a high volume of recent connections. It’s worth noting that these enhancements are currently limited to custom builds of the software. Unfortunately, no new features or functionalities have been introduced in this particular update.
