AnyDesk Advanced vs. TeamViewer Corporate

When searching for a remote access solution, it's crucial to select a tool that not only meets your needs but also provides the best value for your investment. In this article, we will compare the various versions of AnyDesk with those of TeamViewer, highlighting why AnyDesk stands out as a superior choice in many aspects.

AnyDesk SOLO vs. TeamViewer Remote Access

> Watch video here

If you need to connect to your office computer on a daily basis, **AnyDesk SOLO** presents a more cost-effective and powerful alternative to **TeamViewer Remote Access**. Unlike TeamViewer, which limits connections to just 3 devices, AnyDesk enables you to configure **up to 100 devices for unattended access**. Moreover, AnyDesk allows you to **control mobile devices at no additional cost**, a feature not available in TeamViewer's Remote Access version.

Both solutions come equipped with essential features such as **remote printing**, **file transfer**, **two-factor authentication**, **Wake-on-LAN**, **privacy mode**, and **remote reboot**. Yet, AnyDesk offers additional functionalities like **session recording** and the ability to **reverse the connection**, giving you more control during sessions.

AnyDesk SOLO vs. TeamViewer Business

> Watch video here

For professionals providing remote support to clients or managing technical support within an organization, **AnyDesk SOLO** is clearly a more economical option than **TeamViewer Business**. AnyDesk costs less than half the price and allows you to **control mobile devices at no extra cost**.

Both products feature a comprehensive range of advanced capabilities, but AnyDesk excels with its **speed** and **lightweight design**, enabling smoother connections with lower bandwidth usage. Additionally, while TeamViewer Business permits connections to only **3 devices**, AnyDesk allows for **up to 100 devices** for unattended access, making it the most efficient solution for those managing large volumes of devices.

AnyDesk Standard vs. TeamViewer Business

> Watch video here

If you are leading a team that requires a more flexible remote support tool, **AnyDesk Standard** offers substantial advantages over **TeamViewer Business**. With AnyDesk, you can secure up to **20 concurrent channels**, allowing for seamless scaling of your support team, while TeamViewer imposes limits in this area.

Each technician using AnyDesk can establish up to **15 simultaneous connections**, compared to the **3 connections** allowed by TeamViewer. Plus, you can install AnyDesk on **up to 500 devices for unattended access**, whereas TeamViewer restricts you to just **300**.

In addition to being more affordable, **AnyDesk** provides **detailed connection reports**, access to the **API**, and various additional features that make it an ideal choice for high-performance teams.

AnyDesk Standard vs. TeamViewer Premium

> Watch video here

For teams that require even more flexibility, **AnyDesk Standard** delivers significantly greater value than **TeamViewer Premium**. In addition to being more affordable, AnyDesk allows for **controlling mobile devices** at no extra cost and managing up to **20 concurrent channels**, providing scalability that TeamViewer Premium cannot match.

Each technician with AnyDesk can manage **up to 15 simultaneous connections**, in contrast to the **10 connections** permitted in TeamViewer Premium. Furthermore, you can configure up to **500 devices for unattended access**, surpassing the **300 devices** allowed by TeamViewer.

With a robust feature set that includes **session recording** and **file transfer**, AnyDesk remains the most cost-effective and efficient option available.

AnyDesk Advanced vs. TeamViewer Corporate

> Watch video here

For high-performance support teams, **AnyDesk Advanced** stands out as a better choice compared to **TeamViewer Corporate**. In addition to being significantly more affordable, AnyDesk allows you to configure **up to 50 concurrent channels**, which can be shared among **up to 100 technicians**. This level of scalability is essential for large support teams.

Each technician using AnyDesk can establish **unlimited connections**, while TeamViewer restricts this number to **15 connections**. Moreover, AnyDesk lets you set up **up to 1,000 devices for unattended access**, compared to the **300 devices** permitted by TeamViewer Corporate.

With advanced features like **mass deployment**, **session recording**, and **reverse connection**, AnyDesk solidifies its position as the most powerful and efficient tool for large teams.
