Some Help With

Set up a Team

TABLE OF CONTENT

Setting up a team

> **License:** Standard or Advanced
>
> **Relevant for:** License owner

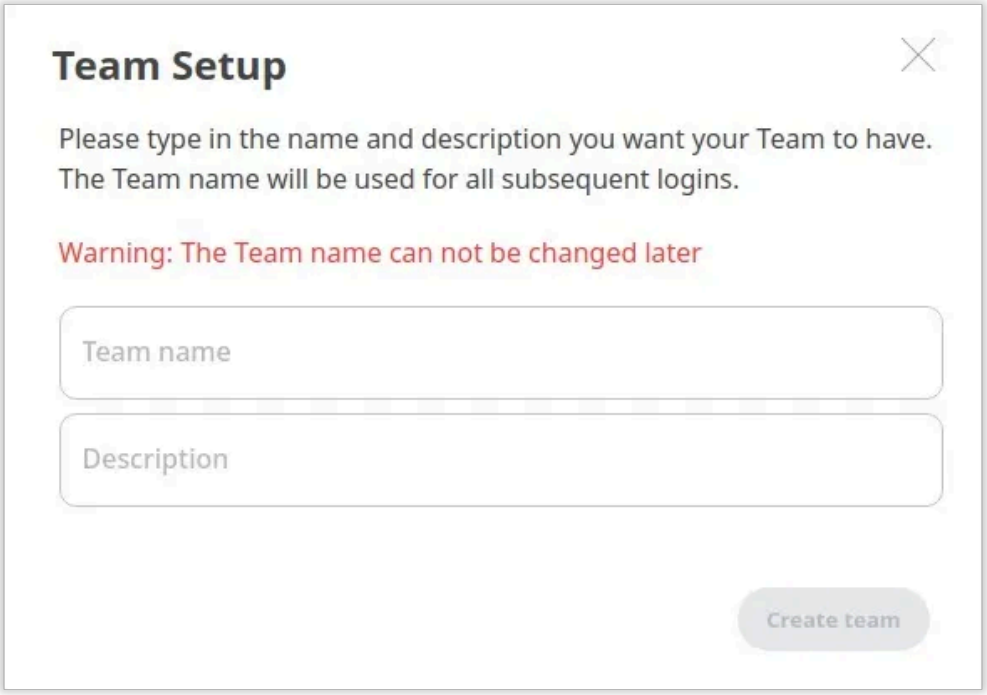

In my.anydesk II, you can configure your team by inviting users. Only users you explicitly invite will be able to sign in, become part of your team, and access license features.

Setting up a team

As the license owner, you can use the my.anydesk II management console to configure your team and manage licensed users.

To set up a team:

1. Open the email from my.anydesk II and follow the verification link to set your password.
2. Create a password for your account and click **Continue**.
3. On the next page, provide your credentials and click **Sign in**.
4. In the **Team Setup** window, enter the following:
    - **Team Name** - the name for your team.
    - **Description** - a short description of your team.

team setup

5. Click **Create Team**.

Once the team is created, you can begin inviting users to join. These users will then be included in your license.
