Some Help With

How to Print on A5 Paper Using AnyDesk: Effective Solutions and Tips

If you've been searching for a way to print on A5 paper using AnyDesk and discovered that support for this size is unavailable, don't worry! Here, we present some effective solutions that can help you resolve this issue.

1. Check Local Printer Settings: Ensure that your local printer is properly configured to accept A5 paper sizes. This involves accessing your printer settings and confirming that the A5 paper size is enabled. Many printers offer specific options for various paper sizes that you can adjust accordingly.

2. Create a Custom Print Profile: If your printer does not include an A5 option, you have the option to create a custom print profile within your operating system. This can be done via the printer settings, allowing you to define a new paper size and manually input the A5 dimensions (148 mm x 210 mm).

3. Use Third-Party Software: There are software applications available that can assist in resizing documents to A5 before sending them to print. Programs like Adobe Acrobat and other PDF editing tools enable you to adjust page size without compromising quality.

4. Virtual Printer Settings in AnyDesk: When using AnyDesk, it's crucial that your printing settings are consistent across both your local and remote devices. Make sure the print drivers are correctly installed and updated. Additionally, check AnyDesk's configuration to ensure there aren't any restrictions preventing available paper sizes.

5. Provide Feedback to AnyDesk: If none of these options resolve your issue, consider sending feedback to AnyDesk requesting support for A5. Developers frequently appreciate user suggestions and may incorporate improvements in future updates.

Remember that remote printing can present challenges, but with these solutions, you can enhance your experience and achieve your desired print size. We hope you find this information helpful! If you have any further questions or need additional assistance, feel free to reach out to us.
