Some Help With

How to Request AnyDesk Whitelist for Non-Commercial Use: Step-by-Step Guide

It’s possible that AnyDesk has detected commercial or professional use and is prompting you to purchase a license, even if you’re using the product only to assist family members or in a non-professional setting.

In these cases, AnyDesk offers a whitelist mechanism that allows you to notify them that your use is not commercial or professional, so you can continue using the software in its free version.

Keep in mind that even if you’re on the whitelist, the system may still detect and block you if it definitively determines that your case warrants the purchase of a license.

To request inclusion on the whitelist, you can use the following page: Whitelist Request
