Maximize Remote Work Efficiency: Unlock AnyDesk Advanced License for Up to 100 Workers

Enhance Your Remote Work Capabilities with AnyDesk Advanced License

The AnyDesk Advanced license provides a powerful solution for businesses looking to expand their remote workforce. This license allows you to add up to 10 Remote Worker (RW) packages, with each package containing 10 licenses for remote workers. In total, this means you can enable as many as 100 remote workers under a single license.

The RW add-on seamlessly integrates with AnyDesk's Standard, Advanced, and Ultimate licenses, creating an efficient and cost-effective way to facilitate remote work. Each remote worker requires an individual license, and the add-on enables a secure connection from the user's device to the designated device within the organization. This makes it easier for teams to collaborate and maintain productivity, no matter where they are located.

When comparing the options, the Standard license allows the addition of up to 2 RW packages, accommodating up to 20 remote workers. On the other hand, the Ultimate license provides the flexibility of adding RW packages without limit, ensuring that your organization has the capacity to scale according to its specific needs and requirements.

Whether you are a small team or a growing enterprise, AnyDesk's licensing options are designed to enhance your remote work strategy, making it easier for you to stay connected and productive in today's digital landscape.
