Some Help With

MyAnyDesk in Detail - Create a Custom Client

TABLE OF CONTENT

Video tutorial

The four steps of the wizard

- Step 1 - General
- Step 2 - Security
- Step 3 - Visual
- Step 4 - Finish Build

Suggested order

MyAnyDesk in detail is a series of guides that walks through every section of the my.anydesk.com console, option by option, with real screenshots and use cases.

This installment covers the complete **Custom Client Generator**: the four-step wizard that produces branded AnyDesk clients with your logo, security rules and preconfigured settings — ready to distribute to teams and customers.

The four steps of the wizard

Step 1 - General

The client's base identity: pre-configured templates, operating system and architecture, connection type (Bi-Directional, Incoming, Outgoing), download availability, build management (Static vs Dynamic) and all Client Settings, including automatic assignment to address books.

Read: Create a Custom AnyDesk Client - General Step

Step 2 - Security

The most important part: interactive access (Auto, Always, Only in Foreground, Never), disclaimer, access control list (ACL), proxy configuration, permission profiles with their own passwords and the advanced key-value settings.

Read: Custom AnyDesk Client Security - Security Step

Step 3 - Visual

The client's appearance: in-app logo, system tray icon color, screen frame, alternative background during sessions, which tiles to show the user, desk preview and custom address text.

Read: Customize the AnyDesk Client Appearance - Visual Step

Step 4 - Finish Build

The final review: what each summary card checks (General, Download, Security), which fields to inspect before creating, what the Create button does and how the build appears in the console list.

Read: Review and Create the AnyDesk Client - Finish Build Step

Suggested order

If this is your first build, go through the series in order: General → Security → Visual → Finish Build. If you already know the wizard, each guide works as a standalone reference for its section.

Need AnyDesk licenses for your team? Sogyo is an official AnyDesk wholesale distributor in Latin America — we help you choose the right plan and deploy custom clients at scale.
