Some Help With

Title: "How to Automatically Adjust Resolution on AnyDesk for a Better Remote Working Experience"

Sure! Here is the rewritten content in English:

If you connect to a remote server and notice that the resolution is too low to work comfortably, you can try to automatically adjust the working resolution of AnyDesk for a more comfortable experience:

1. Look for the monitor icon and click on it.
2. Select “automatically adjust resolution”

You can also try changing the desktop resolution on the remote device by right-clicking and selecting “screen settings”.
