Introduction

At AnyDesk, we understand how frustrating it can be to encounter issues while trying to create an account or access our support system. Whether you are a new user facing challenges in setting up an account for a new team member or experiencing difficulties with the ticketing system, we want to provide you with some solutions and alternatives.

Common Issues

Many users have reported encountering errors when attempting to create an account, which can hinder the completion of the process. Additionally, difficulties in submitting support tickets can further complicate the situation.
It's crucial to ensure that all steps in the process are followed correctly. Below, we outline some essential steps to take:

1. **Check Your Internet Connection**: Ensure that your internet connection is functioning properly, as this can impact account creation processes.
2. **Access the Help Section**: Go to `my.anydesk` and navigate to the "Help and Contact" section. From there, you can select the type of request you wish to make.
3. **Try at Different Times**: If the ticketing system appears to be down, it may be helpful to attempt to submit your request at a later time or try using another device if available.

4. **Direct Contact**: If you require immediate assistance, you can contact AnyDesk support directly at their email: support@anydesk.com. Be sure to provide all necessary information to help them resolve the issue promptly.

Additional Tips

Furthermore, we recommend that all team members stay informed about scheduled updates and maintenance activities that may affect the service. Keep an eye on our official channels to receive the latest news.

Conclusion

We apologize for any inconveniences these issues may cause. At AnyDesk, we strive to deliver the best support possible and are continuously working to enhance our systems. If you continue to experience problems, do not hesitate to follow the steps above or reach out directly to our support team for personalized assistance.
