Are you encountering unexpected session endings while using AnyDesk? This issue can be frustrating, but don't worry – we're here to help. Below, you will find common related error statuses and potential solutions to resolve this issue.

Related statuses:

If you're seeing the message "The session has ended unexpectedly," you might recognize one of the following error statuses:

- anynet_unknown
- win32_10054
- win32_10060
- win32_10061
  To learn more about these **win32** error codes, visit Windows Sockets Error Codes.

Description:

This message can appear when a third-party event or action causes the AnyDesk connection to disconnect. Some common reasons could be:

- The remote device suddenly powers off.
- The local or remote device loses internet access.
- A device-level or network-level security solution ends the AnyDesk session.
